Professional Summary

Software Engineer(Frontend)

- Software Engineer with 3+ years of experience designing and building production-grade web applications using React and TypeScript (Next.js, React Hook Form, React Query, Redux/Zustand). Additional experience with Vue and Web Components. Strong focus on performance, reliability, automated testing, accessibility, and developer experience. Pragmatic and collaborative, with proven ability to standardize UI components, improve tooling, and contribute effectively within agile, cross-functional teams.

Education

Universidad El Bosque

Bachelor's Degree in Systems Engineering

January 2016 – June 2022

Bogota, Colombia

Universidad Nacional de Colombia

Diploma in web development

July 2021 – December 2021

Bogota, Colombia

Technical Skills

- **Languages and Web Technologies:** JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SCSS, Pug
- **Frameworks and Libraries:** React (Next.js – including App Router & Server Components, React Hook Form, TanStack Query, Redux, Context API, Zustand), Vue (Vuex, Pinia, Composition API, Vuetify, Quasar), LitElement, Web Components
- **State Management & Data Fetching:** Redux, Zustand, Context API, React Query, TanStack Query
- **Styling and UI Components:** Material UI, Tailwind CSS, Bootstrap, Ant Design, Chakra UI
- **Testing:** Jest, React Testing Library, Cypress, Vitest
- **Tooling and Building:** Vite, Webpack, Babel, ESLint, Prettier, npm/yarn/pnpm
- **Version Control and CI/CD:** Git, GitHub, GitLab, Bitbucket, Jenkins
- **Other:** RESTful APIs, GraphQL, Axios, Bash, SEO best practices, Mobile first, Storybook

Soft Skills

- **Collaboration & Communication:** Effective communication, active listening, clear documentation, and strong teamwork in cross-functional and multicultural environments.
- **Problem-Solving & Ownership:** Critical thinking, structured problem-solving, debugging under pressure, and end-to-end ownership of features from design to delivery.
- **Adaptability & Learning:** Fast learner, comfortable working with new technologies, changing requirements, and evolving product priorities in agile environments.
- **Ways of Working:** Agile development (Scrum, Kanban), project and time management, code optimization, and performance tuning with a focus on business impact.

Experience

EPAM Neoris

May 2025 – Present

Software Engineer (Frontend)

Bogota - Colombia, Remote

- Design and build modular, reusable UI components with LitElement and Web Components for an international banking back-office platform, focusing on performance and accessibility.
- Adapt quickly to a proprietary front-end framework and custom build tooling, contributing improvements to maintainability and developer experience.
- Integrate front-end modules with backend services and third-party APIs, handling authentication, error states, and secure data flows.
- Collaborate with distributed, multicultural teams in an Agile environment (Scrum), actively participating in code reviews, grooming, and technical discussions.
- Document and standardize internal component libraries and UI patterns, accelerating feature delivery and onboarding for new team members.

Simetrik

May 2024 – February 2025

Software Engineer (Frontend)

Bogota - Colombia, Remote

- Owned front-end development of data-intensive financial dashboards using React and TypeScript, prioritizing readability, scalability, and UX consistency.
- Implemented reusable UI components and complex tables for accounting workflows, reducing code duplication and simplifying feature evolution.
- Integrated data visualization using libraries such as D3.js and Chart.js to expose key financial KPIs, reconciliation statuses, and error tracking.
- Improved reliability through unit and integration tests with Jest and Cypress (and React Testing Library where applicable), helping catch regressions early.
- Collaborated closely with product, backend, and QA in an Agile/Scrum environment to plan, estimate, and deliver features iteratively.

Softserve

January 2023 – June 2024

Software Engineer (Frontend)

Ukraine - Colombia, Remote

- Developed and maintained enterprise front-end applications for international clients using React, Vue, and TypeScript.
- Implemented responsive and accessible UIs with Material-UI, Vuetify, and Tailwind CSS, following design system guidelines and WCAG best practices.
- Designed and optimized state management solutions with React Hook Form, Context API, Vuex, and the Composition API, improving performance and reducing complexity.
- Wrote unit and end-to-end tests with Jest, React Testing Library, and Cypress, contributing to stable releases and CI pipelines.

Teleperformance

January 2022 – January 2023

Front End Developer

Bogota, Colombia, Remote

- Built interactive, component-based interfaces with React for customer-facing web experiences, emphasizing usability and accessibility.
- Optimized web performance and SEO (bundle size, lazy loading, caching), reducing page load times by approximately 30% and improving Core Web Vitals.
- Implemented micro-animations and transitions aligned with brand guidelines to enhance user engagement without degrading performance.
- Participated in code reviews and pair programming, promoting best practices and helping standardize front-end patterns across the team.
